rangjalad.

Dir:

1/2 -

Bizonystan:

Az előző lizonyításban beláttuk, hogy ha az A matrix Selbantásában a diadok szema S, akkor az A S-edrendű bal felső szervezet f O

Lassur de, hages bienneles S+1-edrende nimora vissont =0. Adjunt horra logs O estele diadot:

$$A = \sum_{k=1}^{S} \mathcal{U}_{k} \mathcal{E}^{T} + \widehat{\mathcal{U}}_{s+1} \cdot \mathcal{Q}^{T} = \widehat{\mathcal{U}} \cdot \widehat{\mathcal{V}}^{T}$$

$$A = \begin{bmatrix} u_1 & u_2 & \dots & u_{s} \\ u_{s} & u_{s+1} & \dots & \dots \\ \dots & \dots & \dots & \dots \\ u_{s} &$$

Elekor barneligik S+1-edrewli nimar erteke O, mert V wolse some vsupa O-bel all. Telet nimben S-nel magasalet render nimera O, azaz a matrix rangja S.
